

HALES AUSTRALIA

YOUR COMPLETE EDM SUPPLIER

HALES EDM5

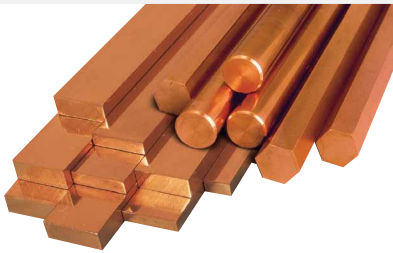

Dielectric Fluid

EDM5 is a water white, low viscosity di-electric fluid with a high flash point, which reduces the fire hazard. It is free of carcinogenic materials, has no unpleasant odour and due to its low viscosity and surface tension, it has minimal drag out.

Hales EDM5 fluid is a high quality solution with all the benefits that make it a superior product, and it's competitively priced.

Available in 20Ltr & 205Ltr.

TELLURIUM COPPER

For EDM Electrodes

Tellurium copper's resistance to hydrogen embrittlement and high conductivity make it a good choice for electrical applications, especially those which require extensive machining. The addition of tellurium to copper results in short, clean chips and allows cutting speeds of five times those used with pure copper, with much less wear on tool life.

Tellurium Copper comes in square, round and rectangular.

FILTER ELEMENTS

For EDM Machines

Hales stock a large range of high quality, long life and cost effective EDM filters for EDM wire cut and sinking machines. Our range of wire includes both water and oil filters.

Visit the Hales Australia website to see our full range of products.
